uma recycled PET PEN production

rPET is used to manufacture a PET ballpoint pen. The required granulate is obtained from recycled PET bottles. 0.5 litre PET bottle produces exactly the material required for the production of a ballpoint pen housing – “upcycling” in its best form.

With the use of uma recycled PET PENs we assure you that a recycling process has already been supported and that the writing instruments can be fed into further recycling cycles. The 100% European production is also climate-neutral and thus sets a further example for sustainable and long-lasting advertising.

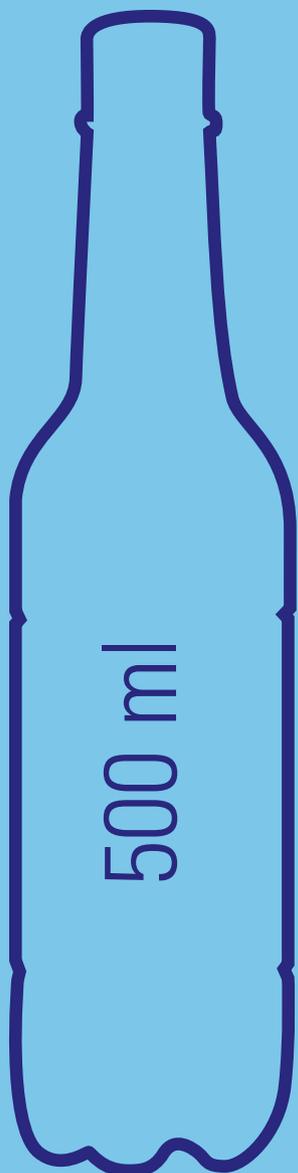

The uma recycled PET PEN protects our environment due to the European production and the long-writing uma Jumbo refill.

**GOOD FOR THE ENVIRONMENT –
GOOD FOR YOU**

**Your advantages with the
uma recycled PET PEN series**

recycled PET PEN

Recycling writing implements in different colours and surfaces.

Special colouring possible.

MIX and MATCH option.

One recycling process has already been carried out.

The sustainability process has already started.

Significantly lower energy consumption in production compared to bio-plastics.

More positive CO₂ balance.

Material is very durable and suitable for upcycling.

Climate neutral production and finishing.

Certified by Global Recycled Standard.

European production.

rPET can be fed to the „Yellow Bag“.

rPET can be recycled multiple times.

A 0,5 liter bottle gives a ballpen housing.

Nominated and awarded several times.

RECYCLED PET PEN PRO SI

RECYCLED PET PEN PRO SI Recycled² – the most sustainable combination in a writing instrument!

Recycled PET beverage bottles meet recycled aluminium beverage cans. The uma rPET PRO series is one of the most sustainable writing instrument developments in the promotional industry. A 100 % climate-neutral, European and Global Recycled Standard certified production built up the basics for long-lasting and sustainable writing. The new upcycling idea adds elegant metal applications to the previously pure recycled PET writing instrument series. A recycled aluminium 150 ml beverage can is recycled into 10 valuable metal tips that meet a PET housing of a recycled 0.5 l PET bottle. So with the uma RECYCLED PET PEN PRO SI you write the most sustainable combination for the environment – just: uma Recycled².

Sustainably combined with innovative writing technology – The uma ink flow system

Thanks to the innovative further development of the uma Recycled PET PEN PRO series, additional types of writing system and promotional options have been created for customers. Along with the classic ballpoint pen, other identical writing systems made from rPET material can be used with the same sustainability benefits.

This means you can now write sustainably with the **uma highlighter:**

RECYCLED PET PEN PRO LIQEO

Text markers are an essential office item. Highlighters are therefore perfect for office use and as an advertising and communication tool. These models can be optimally used in schools, at training fairs or when recruiting trainees.

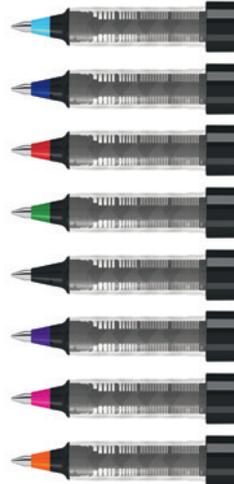

RECYCLING PET PEN PRO LIQEO

RECYCLED PET PEN PRO ANTIBACTERIAL

ANTIBACTERIAL AND ANTIVIRAL

It is made of antibacterial and antiviral plastic containing a special additive which prevents bacteria from colonising the surface of the pen.

TESTED AND CERTIFIED

Laboratory tests have shown that up to 99.99% of bacteria and pathogens on the surface of writing instruments are eliminated. Tested according to ISO 21702 (antiviral) and ISO 22196 (antibacterial) effect is guaranteed for the entire life of the writing instrument and thus offers lasting protection.

MADE IN EUROPE

Short and fast delivery routes enable reliable and short-term production and create an additional contribution to the preservation to the environment.

CLIMATE NEUTRAL

The writing instruments are produced in Europe and finished climate neutral in the Black Forest. In this way, an additional positive contribution to the environment is made.

RECYCLED

The barrel is made of 100% recycled PET bottles. With the use of uma recycled PET PENS we assure you that a recycling process has already been supported and that the writing instruments can be fed into further recycling cycles.

The rPET material, which is produced in Europe from recycled PET bottles, is suitable for a durable and sustainable advertisement. The RECYCLED PET PEN PRO antibacterial offers several sales arguments: recycled, environmentally friendly, climate-neutral, antibacterial and antiviral. Due to the special nature of the material (recycled PET material) production-related variations are possible.

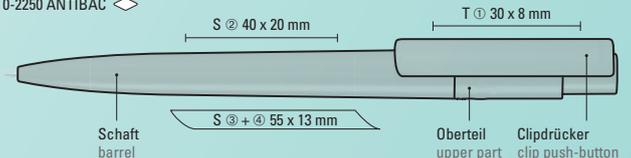

0-2250 ANTIBAC: Retractable ballpoint pen made from recycled, antibacterial and antiviral recycled PET material with opaque glossy housing and clip. The ISO 22196 and ISO 21702 tested antimicrobial additive of silver ions gives the rPET material an antibacterial and antiviral effect that reduces the adhesion and settling of bacteria or pathogens on the surface of the writing instrument by 99.99%. The antimicrobial additive incorporated into the rPET material cannot be rubbed off or released and is effective over the entire life of the writing instrument. A permanent reduction of pathogens is given.
