

# RECYCLED PET PEN PRO

## antibacterial

Die Handschrift der Werbung

### ANTIBACTERIAL & ANTIVIRAL

A special antimicrobial additive gives the recycled PET material antibacterial and antiviral properties. The antimicrobial effect is maintained throughout the service life of the writing instrument.

### TESTED & CERTIFIED

The antimicrobial technology has been shown to reduce bacterial growth and viral activity on the surface by up to 99.99%. Tested in accordance with ISO 22196 (antibacterial) and ISO 21702 (antiviral).

### MADE IN EUROPE

The recycled PET material is produced in Europe. The model is manufactured in Europe and is ClimatePartner certified.

### RECYCLED

The housing is made from 100% recycled PET material, which is produced from recycled PET bottles. At the end of its service life, the material can be recycled again.

RECYCLED PET PEN PRO antibacterial  
0-2250 ANTIBAC

**Mix n' Match:** From 2,000 pieces, you can choose any colour combination.

**0-2250 ANTIBAC:** Retractable ballpoint pen made from recycled, antibacterial and antiviral recycled PET material with opaque glossy housing and clip. The ISO 22196 and ISO 21702 tested antimicrobial additive of silver ions gives the rPET material an antibacterial and antiviral effect that reduces the adhesion and settling of bacteria or pathogens on the surface of the writing instrument by 99.99%. The antimicrobial additive incorporated into the rPET material cannot be rubbed off or released and is effective over the entire life of the writing instrument. A permanent reduction of pathogens is given.

The recycled PET material, produced in Europe from recycled PET bottles, is used to manufacture the model. The model is manufactured in Europe and is ClimatePartner certified. The **uma RECYCLED PET PEN PRO antibacterial** combines several product features in one writing instrument: recycled PET material, ClimatePartner certification, as well as antibacterial and antiviral properties.

Due to the special nature of the material (recycled PET material) production-related variations are possible.
