

The uma quality refill -
rather writing, better to promote

The uma refills – the core of the uma quality writing instruments

The uma quality refills – the heart of every uma writing instrument and also one of the most important reasons for sustainably successful advertising messages.

uma stands for long-lasting enjoyment of writing and for refills that don't run out of breath so quickly. For this reason we attach the greatest importance to the highest quality – and we make no compromises here.

Thanks to the use of German paste and compliance of ISO standards the uma refills promises writing comfort all along the way. Each handwriting is characterised by its individual font off. Similarly we hold it also with the uma refills. According to your wishes you will find in our extensive refill assortment the best refill technology for the most different writing characteristics and our various material and model variants. But completely whether with ballpoint pen refill, rollerball refill or cart-ridge roller system – write with an uma refill – you can be sure of quality all along the line.

uma Tech® – our proven quality refill

Our uma Tech® refills have long been considered a proven choice when it comes to high-quality and long-lasting writing. They are characterized by a deep and consistently expressive typeface – quality you can rely on.

The uma Tech® refill – the perfect combination of technology and writing pleasure.

Rollerball refills

The uma rollerball refills – literally slide over the paper

Rollerball mines are characterised by a particularly consistent and fluid typeface. The subjective feeling for writing is just as elegant: Rollerball refills give your personal handwriting a light and gentle touch. With the uma High Class rollerball refill you trust in a writing quality that can't be more comfortable.

8-0806 uma High Class Rollerball Refill

European rollerball refill with stainless steel writing tip and ceramic-carbide ball (0.7 mm). Writing capacity: approx. 800 m. German writing paste. Made in Germany. The uma rollerball lead does not dry out immediately even when the cap is removed. That is why we certify an extra long „cap-off“-time.

uma Cartridge roller system

uma cartridge roller system

The **uma cartridge roller system** is an innovative basis for novel rollerball writing instruments in premium quality. Thanks to its specifically developed wear-resistant ball tip, it excels in an unrivalled longevity and operates on the same principle as the fountain pen and can be refilled with standard ink cartridges. Thus, the TC ball tip (0.7 mm) can be reused again and again and will not be disposed of. This makes these writing instruments not only extremely economical, but also very environmentally friendly.
